## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-18, 23, 24, and 25 are drawn to Class 1, classified in class 600, subclass 447.
  - II. Claims 19-22, 26, 27, and 28 are, drawn to Class 2, classified in class 600, subclass 458.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions in Class 1 and Class 2 are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Class 1 deals with scanning via transmission and reception control circuit which is in line with electronic array scanning (Class 600, subclass 447) and Class 2 deals with contrast enhancement by destruction of contrast agent or microbubble. The subcombination has separate utility such as contrast enhancement (Class 600, subclass 458).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Marvin Spivak on November 21, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
